

In the Claims

Please cancel claims 1 through 17 and add claims 21 through 28 as detailed in the following set of claims incorporating the notation and mark-up in accordance with the Revised Amendment Practice as follows on the subsequent page:

1 - 17 (cancelled)

18.(original) A rack for a portable greenhouse having a tray comprising:
at least two side rails of a length to be supported by opposite sides of the tray;
a plurality of cross rails adapted to be removably connected to two of said side rails;
said side rails having lateral connector openings disposed therein, at regular intervals of a
preselected distance x extending from one end of the rail to the other end of the rail;
said cross rails having a length of x and a connector pin disposed on each end of the cross
rail, said pin having a cross-sectional dimension so as to be tightly received in the connector
opening;
whereby the cross rails may be removably connected to the side rails at selected openings
to form a rack suspendable by the sides of the tray.

19.(original) A rack for a portable greenhouse according to Claim 18 wherein the side rails on
one longitudinal surface thereof, have a receiving slot disposed in the surface vertically above the
connector opening and the side rails have on each end thereof, disposed above the connector pin,
a connector land having a cross-sectional dimension so as to be closely received in said
connector slot when said connector pin is received in the connector opening.

20.(original) A rack for a portable greenhouse according to Claim 19 wherein said connector
pins have disposed on the exposed ends thereof, a detent cooperable with the side rail at the
connector opening whereby the cross rail is detachably connected to the side rail.

21.(new) A rack for a portable greenhouse according to claim 18 wherein the side rails have a
first and a second vertical section and an elongated horizontal section connecting the lower ends of
the vertical sections.

22.(new) A rack for a portable greenhouse according to claim 21 wherein the side rails vertical section has a transverse recess for receiving a cross rail as a handle.

23.(new) A rack for a portable greenhouse according to claim 22 wherein the side rails have a lateral connector opening disposed adjacent the upper end of the vertical sections to receive the cross rail pins therein.

24.(new) A rack for a portable greenhouse according to claim 20 wherein the detent is formed by a slightly enlarged head disposed on the pin, which on insertion through the connector opening, retards the detachment of the pin from the rail.

25.(new) A rack for a portable greenhouse according to claim 18 wherein the side rails have a length comparable to the width of the tray and have outwardly opening end notches for engaging and receiving the sides of the tray.

26.(new) A rack for a portable greenhouse according to claim 18 wherein the cross rails are disposed in successive connector openings.

27.(new) A rack for a portable greenhouse according to claim 18 wherein the cross rails have a length of $2x$.

28.(new) A rack for a portable greenhouse according to claim 27 wherein the cross rails are disposed in every other successive connector opening of the side rails.

29.(new) A rack for a portable greenhouse according to claim 18 wherein the cross rails have a length of $3x$.

30.(new) A rack for a portable greenhouse according to claim 29 wherein the cross rails are disposed in every third successive connector opening in the side rails.
